

# List of Pennsylvania Water-Well Drillers

This is a Pennsylvania Bureau of Topographic and Geologic Survey list of water well drillers that constructed wells in Pennsylvania from as long ago as the 1880s to the present. Use the Adobe Reader PDF search command, or Ctrl F, to search for a particular driller name. The "license" number or variations of the driller name can be used to search for water well records in the Pennsylvania GroundWater Information System (PaGWIS) at:

<http://www.dcnr.state.pa.us/topogeo/groundwater/pagwis/index.htm>.

Note that many drillers share similar names, but a particular driller license number will represent one specific drilling company (although some companies have changed license numbers). Drillers with negative numbers represent companies that may have drilled prior to driller licensing, or that were not licensed for various reasons. The negative numbers were assigned by the Bureau sometime during the 1990s. They likely represent companies that were no longer in business at the time. Most water well records by these companies were drilled prior to 1965.

A list of water well drillers currently licensed by the Commonwealth of Pennsylvania is available at: [http://www.dcnr.state.pa.us/topogeo/groundwater/gw\\_privwells/drillers/index.htm](http://www.dcnr.state.pa.us/topogeo/groundwater/gw_privwells/drillers/index.htm) These are water well drillers that are licensed under Act 610, the Water Well Drillers License Act. The current drillers list is automatically updated and so will include drillers who become newly licensed, but may not be included in the historic list of water well drillers until it is updated.

Department of Conservation and Natural Resources
